

Manufacture and control of medicated feedingstuffs

Written by Petra Müllerová - Last Updated Tuesday, 21 March 2017 12:40

All necessary guidance documents concerning manufacture and control of medicated feedingstuffs are placed in this section. They are based on requirements defined in the Directive 90/167/EEC and basic principles of Good Manufacturing Practice which can be found on section Manufacturing and control of VMPs.

The section is divided into:

- Guidance documents for manufacture of medicated feedingstuffs
- Forms (application for licence and its variation, templates for veterinary prescription for MFs, etc.)
- Registers and lists (register of MFs manufacturers, list of authorised medicated premixes)

Mrs. Jarmila Kyllarová, DVM, CSc. (kyllarova@uskvbl.cz) is person responsible for manufacture of medicated feedingstuffs. (this email address is protected, to see it allow Java Script).
